QL2 Announces 13th Consecutive Quarter of Revenue Growth
Adds three sales executives to accelerate trend

Seattle – April 5, 2005. QL2 Software today announced its 13th consecutive quarter of revenue growth. Launched in April of 2000, QL2 weathered the “tech wreck” and emerged as a leading provider of web mining and unstructured data management tools and solutions.

To accelerate its growth trend, QL2 also announced the hiring of three senior sales executives:

- Paul Campbell, Vice President of Travel Solutions
- Mathew Cole, Director of Life Sciences Solutions
- Brian Nelson, Vice President of Business Development

Combined, these individuals bring over 40 years of relevant experience with Fortune 1000 companies.

“Through hard work and sacrifice, QL2 has achieved financial success without the benefit of venture capital”, claimed QL2’s president Chris Buckingham. “We can now invest to accelerate growth using internally generated cash.”

About QL2:

QL2 Software has become the leading provider Web mining and unstructured data management tools and solutions using its flagship technology, WebQL. Its customers include over 20 Fortune 500 companies and are among the largest in the travel, retail, distribution, and life sciences industries.
