International distribution network for WebQL

Awarding winning software now sold and supported worldwide

SEATTLE, Wash., May 22, 2002 – Caesius Software, Inc., a provider of Web Harvesting software for Web research automation and Enterprise Application Integration (EAI) announces the naming of two international distributors, Affinité Europe and Information Gateways, for its award winning product, WebQL. Picking up where search engines leave off, WebQL makes precise extractions of Web information using open-ended queries. It improves productivity for large organizations engaged in business intelligence, competitive intelligence, and research activities.

Affinité Europe, located in the United Kingdom, has been servicing enterprise customers in the Europe, Africa and Middle East markets since 1991. Information Gateways of Sydney, Australia has been doing the same in Australia and New Zealand since 1983. "To properly represent and support WebQL, organizations must understand the service and support requirements of large enterprises. Both of these companies have a long history of doing exactly that in their respective markets. Caesius is delighted to have them representing and supporting WebQL", commented Chris Buckingham, president of Caesius.

About Caesius

Caesius Software™, Inc. (www.Caesius.com) is enabling organizations to gather and manage critical business information from the World Wide Web. This Web information gathering process is earning its own labels among industry analysts -- "Web Harvesting", "Web Mining", or "Web Farming." Caesius has developed a powerful award-winning product, WebQL, automating this tedious process by systematically pinpointing and extracting information from the Web for presentation in readable report formats or delivery to applications for additional processing. This patent-pending technology powers business intelligence (BI) and facilitates enterprise application integration (EAI) delivering significant business benefits to companies and institutions of all sizes.

Founded in April 2000, Caesius Software's has won critical acclaim for its product, WebQL from industry analysts and the press. Launched in March 2001, WebQL Enterprise Edition is already being used to harvest the Web by some of the largest companies in the world.
