Caesius Software's WebQL Honored at COMDEX

Northwest Technology Companies Dominate 2001 PC Magazine Technical Excellence Awards

SEATTLE, Wash., November 13, 2001 – Caesius Software received high praise Monday evening at the Eighteenth Annual PC Magazine Technical Excellence Awards ceremony, held at COMDEX in Las Vegas. Caesius' flagship product, WebQL, was a finalist in the Internet Services and Software category. Other Northwest finalists included Redmond's SimulRing and the category award winner, RuleSpace Contexion Services, based in Portland.

"This is a great honor and a unique opportunity to further showcase WebQL as an invaluable tool that works around the clock to deliver valuable information from the Internet and enables businesses to be extremely competitive," remarked Chris Buckingham, president of Caesius Software. "There is no better solution for finding and extracting Web information for competitive intelligence, market analysis, or scientific research."

PC Magazine recognizes the most innovative products and services released during the past 12 months on an annual basis at COMDEX. Other companies PC Magazine recognized for excellence in technology included: Microsoft, IBM, Intel, Novell and Xerox. The honor of being named a finalist by PC Magazine is one of many honors and awards won by WebQL during the past twelve months.

About Caesius

Caesius Software™, Inc. (www.Caesius.com) is enabling organizations to gather and manage critical business information from the World Wide Web. This Web information gathering process is earning its own labels among industry analysts -- "Web Harvesting", "Web Mining", or "Web Farming." Caesius has developed a powerful award-winning product, WebQL, automating this tedious process by systematically pinpointing and extracting information from the Web for presentation in readable report formats or delivery to applications for additional processing. This patent-pending technology powers business intelligence (BI) and facilitates enterprise application integration (EAI) delivering significant business benefits to companies and institutions of all sizes.

Founded in April 2000, Caesius Software's has won critical acclaim for its product, WebQL from industry analysts and the press. Launched in March 2001, WebQL Enterprise Edition is already being used to harvest the Web by some of the largest companies in the world.
