Caesius Software Appoints New President

Chris J. Buckingham to Lead International Launch and Rollout of Web Harvesting Software

SEATTLE, Wash., August 6, 2001 – Caesius Software, Inc., a provider of Web Harvesting software for business intelligence (BI) and Enterprise Application Integration (EAI), announces the hiring of Christopher J. Buckingham for the position of president. In this position, Buckingham will oversee the strategic direction and international rollout of WebQL, Caesius' core product offering.

Prior to joining Caesius, Buckingham served as senior vice president of sales and marketing for Attachmate Corporation, the leading vendor of enterprise connectivity software in the world. Prior positions at Attachmate included general management positions of autonomous divisions where he successfully managed P&L, bootstrapped numerous product lines, implemented vertical market strategies and closed strategic acquisitions.

Prior to Attachmate, Buckingham was president and general manager, DSI division, Carlisle Companies, Inc., and also held various executive level positions during his 17-year tenure at Unisys Corporation.

"We are very fortunate to have someone with Chris's experience and proven leadership to build Caesius as it transitions from a product development phase to aggressive business expansion", said Ted Kubaitis, co-founder and chief technical officer of Caesius.

Chris graduated with a Bachelor of Science degree in Business Administration from Michigan Technological University, and has participated in several post graduation courses. He is extensively involved with the community and it is a frequent speaker at computer industry functions.

About Caesius

Caesius Software™, Inc. (www.Caesius.com) is enabling organizations to gather and manage critical business information from the World Wide Web. This Web information gathering process is earning its own labels among industry analysts -- "Web Harvesting" or "Web Farming." Caesius has developed a powerful award-winning product, WebQL, automating this tedious process by systematically pinpointing and extracting information from the Web for presentation in readable report formats or delivery to applications for additional processing. This patent-pending technology powers business intelligence (BI) and facilitates enterprise application integration (EAI) delivering significant business benefits to companies and institutions of all sizes.

Founded in April 2000, Caesius Software's has won critical acclaim for its product, WebQL from industry analysts and the press. Launched in March 2001, WebQL Enterprise Edition is already being used to harvest the Web by some of the largest companies in the world.
