## **QL2 Software and TEMIS Join Forces to Unlock Value from the Web**

*Combined solutions enable customers to create filtered and organized data reports coming from the blogosphere, their reference web and internal sources.*

**SEATTLE and PHILADELPHIA – August 1, 2006** – QL2 Software, a leader in targeted information retrieval and TEMIS, a leader in Text Analytics enterprise solutions, announced a new business alliance today.

Bringing together two exceptional and complementary technologies, this alliance provides customers with the best of breed offer in the information analysis domain. QL2 Software's data retrieval and extraction combined with TEMIS Text Analytics solution is a powerful two-step system that delivers industry-specific and application-oriented data analysis reports from locked and hidden content. When adopting this solution, customers will greatly reduce the amount of time spent crawling and have the ability to create specialized reports using advanced text analytics capabilities.

*WebQL 3.0*<sup>®</sup> from QL2 Software is a powerful platform automating the tedious process of extracting information from the Web as well as other unstructured data sources then reformatting it into structured and actionable formats. *WebQL*<sup>®</sup> extracts information inside and outside firewalls, monitors password protected sources like newswires, trade journals, email repositories, websites and blogs, and then displays the relevant data. With the ability to extract and integrate data from virtually any source, *WebQL*<sup>®</sup> gives the enterprise seamless access to any type of information to further extend business and competitive intelligence, enterprise search, text analytics, and other business operations solutions.

*Online Miner*<sup>™</sup> 3.2 from TEMIS is a Text Analytics and Discovery solution. *Online Miner*<sup>™</sup> enhances the use of information by extracting documents' key concepts and their meanings, for automatic classification and the discovery of new relationships and associations. *Online Miner*<sup>™</sup> provides many graphical options enabling results visualization and navigation within corpus, giving faster access to relevant information. *Online Miner*<sup>™</sup> plays a critical role in fields where information processing is complex due to the great volume of data, such as Competitive Intelligence, Customer Relationship Management, Scientific Intelligence and Reputation Management, and provides substantial productivity gains. *Online Miner*<sup>™</sup> provides superior results from Text Analytics, due to its advanced linguistic engine and the use of customizable, domain-specific *Skill Cartridges*<sup>®</sup>.

-more-

"WebQL is capable of delivering vast amounts of relevant text on-demand or on a scheduled basis," said Chris Buckingham, President and CEO of QL2. "Combining this high powered aggregation capability with the superior Temis analytics results in powerful enterprise applications with a fast ROI."

"I am very proud of this business alliance that materializes a fruitful collaboration with QL2 for more than a year on successful customer projects", said Eric Brégand, CEO of TEMIS. "The combination of our two world leading technologies really empowers end-users who want to take business advantage of unstructured data stored on the web or any other sources."

Under this partner agreement, QL2 Software and TEMIS will be partners and value-added resellers for both solutions.

#### **About QL2 Software, Inc.**

QL2 Software's web mining and unstructured data extraction solutions empower business intelligence, enterprise search, and text analysis applications for large companies and institutions throughout the world. With more than 30 customers in the Fortune 1000, QL2 provides the data that drives the enterprise. In 2005, QL2 joined IBM's Unstructured Information Management Architecture (UIMA) open source initiative, was named to KMWorld's Top 100 Companies, and placed high on the list of Fastest Growing Private Companies in Washington by the Puget Sound Business Journal.
